

ANAJ Czech, a.s.

Hobs of module from 0,5 to 30 mm

Pre hobbing (with and without protuberance, with semi topping or as full topping)

With optimized economics (heavy duty hobs, hobs with optimized tooth thickness for many reconditioning cycles)

For finish hobbing of workpieces, hob quality from B/c to AAAA

Special design like sprocket chains, spline shafts, etc.

All cutting tool materials (HSS, PM-HSS, carbide)

Wide selection of coatings for all applications

Hobs

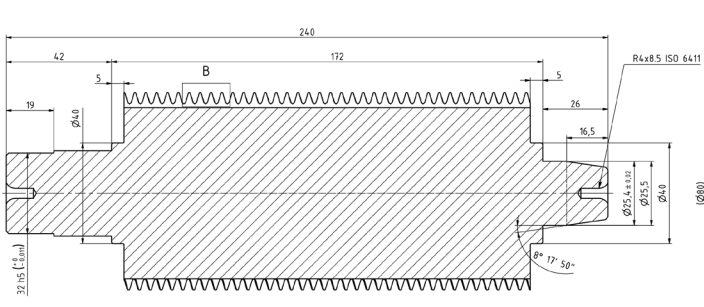

- Finishing hobs
- Hobs with protuberance
- Semi topping of full topping hobs
- Spline shaft hobs
- Sprocket chain hobs
- Belt pulley hobs
- Gashing cutters
- Carbide hobs
- Skiving hobs
- Shank and bore type hobs
- Worn hobs
- Special profiles

- **F**lexible
- **I**nnovative
- **T**imely

Design with bore or shank

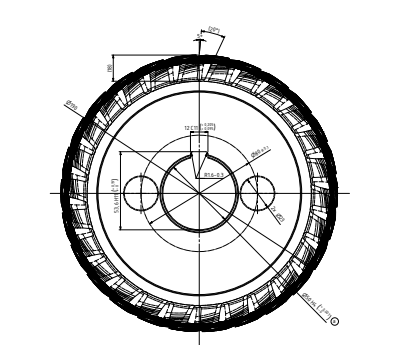

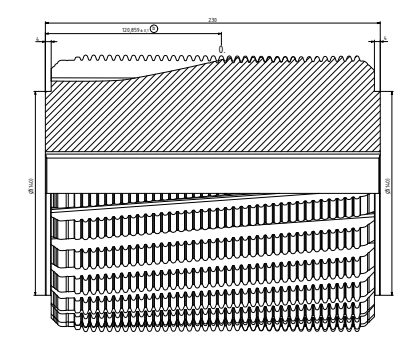

Customer's design of hobs
Special calculation according
to customer's drawing,
Also designed in Inch (DP)

Hobs of module from 0,5 to 30 mm
Outer diameter up to 330 mm
Hob length up to 450 mm
Cutting tool materials: HSS PM, PM+, carbide

Cutting tool materials: HSS PM, PM+, carbide

Milling cutters
Rack milling cutters
Special profiles

Complex design
High accuracy
Customer's design profiles
Customer's Project

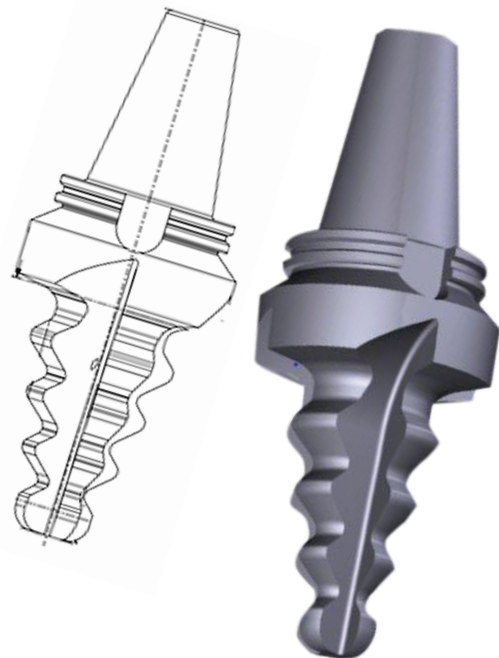

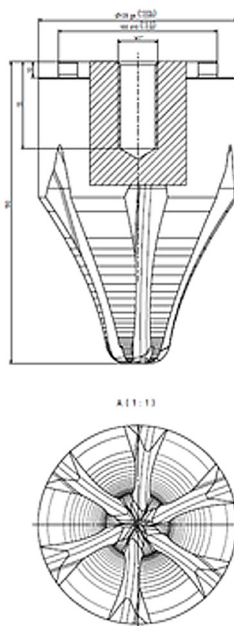

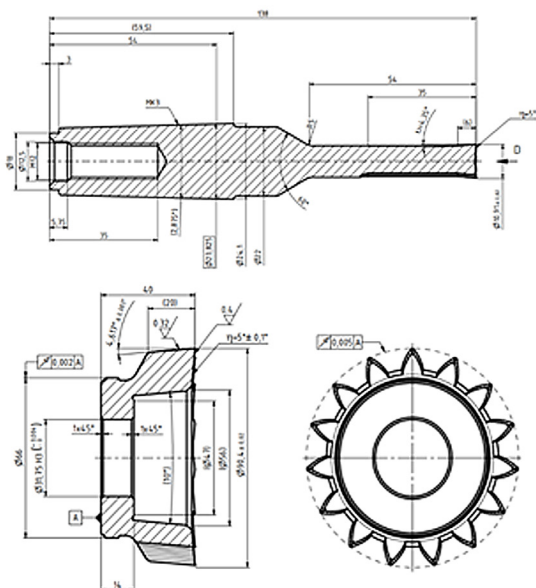

Form cutters for rotors

Special design with long shafts

Design for premachining
and finish milling

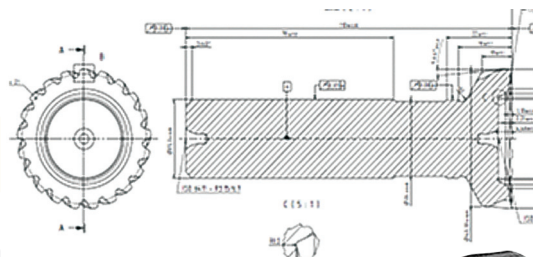

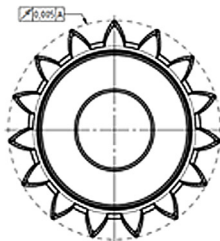

Cutting tool materials: HSS PM,
carbide PVD coatings: TiN,
AlTiN, AlCrN

Shaping cutters

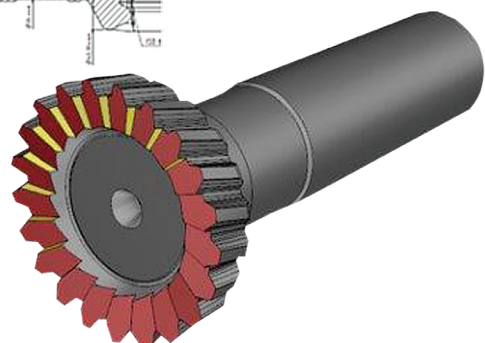

Design for straight or helical gears
Cutting tool materials: PM-HSS,
carbide

PVD coatings: TiN, TiAlN, AlCrN
Bore type or shank type tools

Power Skiving

Shank and bore type cutters
Latest productions technology
and design software
External and internal gears
up to module 5

Wide product portfolio: Special tools, complete project offers and tool management

- Drills (including extra-long)
- Step drills
- Highly accurate drills
- Reamers combined and shaped
- Cutters (standard, toroid, ball, etc.)
- Form cutters
- Countersinks
- Profile replaceable edge inserts
incl. special holder
- Prismatic cutters for automatic lathes
- Broaching tools

High quality products are achieved by using the latest production technology and measurement systems.
Our processes are according to ISO 9001:2015 certified.
